<u>Units and abbreviations</u>: % w/w = weight percent, < **LOQ** = below the limit of quantitation (0.03 % w/w), **ND** = not detected, n/a = not available.

The results given herein apply only to the sample as received and tested. **Expanded Uncertainty** was calculated using coverage factor k = 2, corresponding to a double standard uncertainty and characterizes the interval value in which it is possible to expect the real value with a probability of 95%. This is stated according to the ISO/IEC Guide 98-3.
